mBIRN2/32Ch Head Coil

Graphs and charts showing various metrics such as slice by slice variance, RMS stability, noise spectrum, and Wessloff plot. Specific data points and values are shown in the graphs.

Additional information includes:
- Max ROI width [pixel]: 31
- Relative STD single pixel [%]: 0.4562
- Relative STD largest ROI [%]: 0.164
- Dno [pixel]: 4.387
- Ghost [%]: -1.07
- SNR summary value: 348.5
- SFDR summary value: 315.5

The interface includes options for stability graph, residual noise graph, and noise control settings.
